

Cost of Living

Alan Corbett

17. What are you or your parties plans to bring down cost of living, without raising inflation?

I will have a meeting of all involved to see if we can come up with some local ideas and solutions. Bundy problems, Bundy solutions.

18. What is your position with regards to governments offering more free money (rego discounts and power bill credits)?

I will monitor its effects and give feedback to government.

19. If you believe in more free money, how will more government handouts help, or will it just kick the can down the road until after the election?

There is no such thing as free money. Taxpayers funds government handouts.

20. Will you and your party investigate sustainable funding methods for local Government, and will you support the mandating of the 'Guideline on equity and fairness in rating Queensland local governments?

This will be a government decision. If legislation is introduced I will examine it and seek advice.

21. What will you as the local member do to address the sometimes up to 1000% insurance premium increases for the 4670 postcode? Will this include reviewing the flood mapping insurers use and ensuring the no greater than 4-6% increases compared to the CPI's Index, as recommended by ABS Data for Residential Properties?

Insurance increases reflect risk assessments so we need to reduce the risks. This task is beyond me but could be addressed by one of the many parliamentary committees.

Bree Watson

Skyrocketing cost of living is the number one issue raised by Queensland families and small businesses and Labor's failures have driven-up costs including electricity, insurance, transport and water.

The LNP has the Right Plan for Queensland's future, including restoring respect for your money.

The LNP will stop Labor's expensive failures and budget blowouts which are pushing up costs for families and small businesses.

We'll identify opportunities to reduce fees and charges, drive down electricity costs by properly maintaining our power plants, and drive down insurance costs by reducing the impact of crime on premiums.

The LNP will also Stop Labor's Patients' Tax as one of the first acts in government, saving Queenslanders and protecting local GP services, if elected next month.

Labor's Patients' Tax starts collecting from July 2025 and the Australian Medical Association Queensland warns it will see an exodus of General Practitioners, end bulk billing in Queensland and increase the cost of a doctor appointment by up to \$30 per visit.

We will use every lever available to ease the crises Labor created and this is just one part of our plan to restore health services when you need them.
